Problem Three license management servers need to be identified for the distribution of floating licenses for the Goddard DAAC site.. These three servers would handle the software packages utilizing Flexlm and Netls license management, one in the SMC (system management center) network and two in the LSM (local system management) network.			
Proposed Solution Two MSS and one ACM servers have been identified for license management. These servers are as follows: ACMHW-GSFC-2, MSS-GSFC-1.1 , for the LSM, and MSS-SMC-1 for the SMC. Please see the attached selection criteria for explanation of the preference for servers.
